

### **Create-A-Park: Brainstorming Questions**

- What natural and/or cultural resources need your protection?
- What threatens your park's resources?
- How will you represent your park to the class?
- What types of transportation will you allow in your park and why?
- What type of activities will you allow in your park?
- What rules do you need to protect the resources of your park?
- What are the safety issues at your park?
- What steps do you need to take to make your park safe for visitors?
- What kinds of things might people try to remove from your park?
- What steps do you need to take to solve removal problems?
- What plants and animals are free to move in and out of your park?
- What impact does this movement have on both the park and the neighbors who live next to the park?
- What natural processes need to be allowed for your park to remain healthy?
- If any natural processes are not allowed, what consequences might you expect?
- Are any non-native plants or animals found in your park?
- What are the effects of non-native species in your park?
- What is the impact of non-native species on native species? What should be done?
- Are any plants or animals that lived in your park 100 years ago now gone? If so, what caused their disappearance?
- Would the habitat in your park still support a population? If not, why not?
- Would it be possible to bring any of the missing animals or plants back? Why or why not?
- What will be the tasks of individual team members?
- How will you represent your park's resources?
- What are the required skills and knowledge involved in managing your park?
- What is the park's mission statement?
